

PRICE REVIEW NOTICE 2018

To all our esteemed clients and stakeholders,

Please be advised that we have reviewed our standard prices for all our laboratory tests and pathology services effective 1st March 2018, which corresponds to the beginning of our financial year.

The annual price review exercise is in line with the Medical Practitioners and Dental Board (MPDB) Fees Guidelines published in 2013 under the Medical Practitioners and Dentists Board Act (Cap 253) with recommended inflation adjustments to 2017:

[http://Medical_Practitioners_and_Dentist\(Forms_and_Fees_\(Amedment\)_Rules_2012.pdf](http://Medical_Practitioners_and_Dentist(Forms_and_Fees_(Amedment)_Rules_2012.pdf)

The new 2018 prices are aligned to be within the recommended min-max range given by MPDB, adjusted based on CPI inflation and forex changes. Some of the test prices have been revised downwards factoring in improved economy of scale on the common tests following upscaling of analyzer platforms at our SANAS-accredited ISO15189-certified 24-hours Main Laboratory in Nairobi.

The Lancet Group of Labs is committed to providing quality tests and excellent standards of service at competitive prices.

Clients who are on contract including hospitals, clinics, insurances, corporates and researchers, shall receive communication on their respective special prices based on new service level agreements via our Business Development Team:
